## I Grow the Best — Discard the Rest

---

Greetings . . . To My Friends:

It is with pleasure that I present you with this, my Dahlia Catalogue for 1951. Your generous and kind support is thoroughly appreciated and inspires me to continued effort to make available to you only the best.

This catalog would not be complete if I were not to take advantage of the opportunity to thank you for your many letters telling of various successes obtained from stock purchased from me. I am grateful to those who have been able to visit my gardens as well as those who have inspected my exhibits at the American Dahlia Society Shows, and many other shows we attend, because I feel my dahlias speak best for themselves.

To those who are familiar with my stock, no introduction is necessary and you have my pledge that the same quality will not only continue but improve if such is possible. To those who have not tried my service this is an invitation, an invitation that may prove a real opportunity for you to realize something you may not have been able to obtain elsewhere and no order is too small nor is any contract too large, I am pleased to serve you.

ALBERT PARRELLA.

### IMPORTANT NOTICE — DO NOT OVERLOOK

Due to the limited space we are compelled to be brief with our descriptions. However, we want our patrons to know that the varieties listed in this Catalog are either Honor Roll Certificate Winners or has proven with us to be truly outstanding. Not only that, but the varieties offered are reliable in every respect, good growers, fine producers, insect resisting foliage and most of them are of large size blooms, and true prize winners. If you are interested in large size dahlias, you surely are not going wrong by ordering from us. This may be of interest to you to know that we do not force our dahlias for size, but we are gratified to know that our customers secure the lion's share of prizes at the Show.

### VISITORS ARE WELCOME

You are cordially invited to bring along as many friends as you possibly can to my gardens at any time after August 15th and see this magnificent sight. You are under no obligation to buy, but welcomed and I will be as happy to see you as you will be to see this magnificent collection of gorgeous massive flowers in all of the colors, shades, and tints of the rainbow.

I will have over 300 varieties, most of them Honor Roll dahlias, as well as many promising seedlings, and many new ones sent by other growers for trial and that have not been released for sales as yet, as well as many novelties.

We want to thank those who have sent to us Seedlings for trial this past season. Assure you we have given them the best of attention. We would appreciate receiving more of them for the coming season providing they are good. We will do all we can to put them over.

Dear Sir:

My friend T. Duran returned from the United States a few days ago and he has no words to express himself of the wonderful attention he received from you during his recent visit there. I myself also feel the urge to express to you my deepest appreciation for your kindness shown him on behalf of my request to see you.

The Dahlia Bulbs which he brought with him have already been planted in pots and I hope to have good luck with them. Once they are in bloom I will select the most appropriate ones so I can place another order with you.

In the meantime I beg you to put my name on your mailing list for your catalogues and price lists so I can receive them regularly.

I congratulate you on the prices you obtained on your recent exhibitions and again thanking you I remain,

Yours very truly,

## **DAHLIAS: WHAT IS KNOWN ABOUT THEM**

**By: MORGAN T. RILEY**

### **A NEW BOOK ON DAHLIA CULTURE**

Publisher: Orange Judd Publishing Co.

Read what the critics say:

This is an ambitious title but the author covers the subject thoroughly in a masterful style.—Gardeners' Chronicle of America.

This book will be a useful guide to both professional and amateur grower, as it is written simply and directly, with a thorough knowledge of the subject.—Florists' Review.

Here is contained a most comprehensive history of the dahlia, replete with pictures from early publications, tracing the history of this exotic flower from its first findings in Mexico through its introduction into Europe and eventually to the United States.—New York Herald-Tribune.

The chapter on culture is most complete and covers all the aspects that any grower will look for. Here are all the details all growers need.

Mr. Riley gives some very important pointers on the care of plants and cut blooms that are to go to the show table. All the necessary suggestions that will help the grower to win blue ribbons are set forth in detail.—New York Herald-Tribune.

I have never read a more sensible book on the growing of one genus.—Golden Gardens. The entire volume is highly recommended.—Gardeners' Chronicle of America.

Above book can be secured through Parrella Dahlia Gardens

Price \$2.50, plus 7c postage.

#### TEN BRIEF SUGGESTIONS TO THE AMATEUR ON HOW TO GROW BETTER DAHLIAS

1. Select easily grown varieties and those giving full satisfaction.
2. Prepare the selected planting spot well and place the supporting stake.
3. Dig a hole next to the stake, about 10 inches in diameter and 7 to 8 inches deep, and place one handful of bonemeal in the hole, or any other recommended fertilizer and mix thoroughly with the soil before planting.
4. Place roots in flat position with the sprout or "eye" facing upwards. Cover lightly with about 2 inches of soil. In doing this be careful not to damage the sprout. As the plant grows, fill around the stem with soil.
5. Do not plant too early. At times, too early planting spoils good roots. I would suggest planting from June 1st on, except in climates where a short growing season is prevalent. In that case use your own judgment.
6. Keep the soil well cultivated throughout the season, and prevent weeds from outgrowing the plant.
7. Water plants during hot weather at least once a week. Do not merely sprinkle them, but soak them. This must be done after sundown.
8. Tie the plant to the supportive stake with soft cord, at distance of 12 inches apart. This is done as an added security against destruction by wind and storm. Spray with any reliable parasiticide at least once every two weeks.
9. About August 1st, scatter a handful of bonemeal about 6 inches around the stem and rake it gently into the soil. Other fertilizers may be used if desired. Do not use excessive amounts of fertilizer as injury to the roots will result.
10. About August 15th, the same treatment as above is applied. Disbudding at this time aids in the formation of bigger and better flowers and longer stems. This should insure good results. If any other information is desirable, I will gladly forward you the same.

WANDA MEADE

The charming young lady is WANDA MEADE holding the beautiful blooms of the dahlia named in her honor.

**WANDA MEADE I. D. (Parrella—Blamer-Hulin)**—This medium size dahlia which received First and Special at the A. D. S. Show in New York, 1942, and also received a Bronze Medal from the New York Florists' Club on September 14th, 1942, is one of the most outstanding and showy dahlias we have had the pleasure of introducing. Color, scarlet red, evenly tipped white. Blooms average from 5 to 7 inches in diameter with plenty of depth. The blooms are set on fine, long, wiry stems, flowers facing. Foliage light green, insect resisting. Height of plant, 4½ feet. **Root \$1.25**

**WINGS S. C.**—Dark Carmine. Large, outstanding.

**Root \$1.50**

**WORLD EVENT F. D. to I. D. (Dixie Gardens)**—Color, amaranth pink flushed mallow purple, general effect being soft, glowing pink. Size 9" x 6", without much disbudding. It has a high center and is complete back to stem; flowers are held on the side on a long strong stem. Certificate winner at Storrs and East Lansing in 1943, and on three honor rolls. **Roots \$1.50**

**WHITEHALL S. C. (Silverio-Johnson)**—Pure White flower, size 10 to 12 inches. Strong growing plant, producing eight prize winning blooms at one time. Show record astonishing. Planting less than seventy hills — entered in nine shows with total 205 blooms. Won two Achievement Medals, three best of shows, Gold Medal Certificate, most meritorious display (basket) and 30 first prizes. A record for undisseminated dahlia. An Honor Roll dahlia priced right. **Root \$5.00 Plant \$2.50**

## JUST A FEW OF OUR MANY TESTIMONIALS

Brooklyn 13, N. Y.

Dear Mr. Parrella:

Enclosed please find check, in amount \$29.50 for the 2 orders, and the extra Root of Dahliamum. \$1.50 Root; Order Nos. 7906 and 7938.

I thank you for the fine way you attended to my orders, and I wish you a very successful season with your Dahlias. If it is possible, I'll try to make a visit to the September Exhibition if I will feel stronger. With all good wishes for your good health,

Gratefully yours,

S. F. M.

Kerrville, Texas

April 10, 1950

I want to thank you so much for finding the "Lord of Autumn" and sending it to me. It is one of my favorite dahlias and I appreciate it very much but I wish that you would send me a bill for the expense and trouble.

I am highly pleased with all the bulbs that I have ordered from your company and find they are far superior than any other bulbs that I have tried. The Ogden Reid that I ordered from you last year grew several blossoms that were over 14 inches across. Many of my friends could not believe it and had to come and see for themselves. Quite a few indicated they were going to order from you and I am sure they will be pleased.

Thanking you again for your kindness and courtesy, I remain,

Sincerely,

Mrs. S. M. K.

Oak Bluffs, Mass.

August 3, 1950

Dear Sir:

Not having seen that extra dahlia root listed in your catalog I thought you might be interested in hearing about it. I refer to the variety named Martha Blohn.

To begin with I decided to grow it naturally. There was no feeding, pruning, etc., and a minimum of disbudding. Hence it was the same as field grown. Plant growth was steady and the usual period of slow growth was absent. In early July it was 4½ ft. tall and the first bloom was July 20. It is a bushy plant but an attractive one with well spaced lateral growth. Insects seemed to ignore it.

First bloom was an unusually beautiful violet rose ID and ten by five.

Sincerely,

A. E. C.

## HOW TO GROW DAHLIA FROM SEED

There are many ways that dahlia seeds are started, and grown, on account of the different climatic conditions, and the length of the growing season, here in New York City, I have been getting wonderful results as follows: About April 1st, I select an open sunny location in my garden and spade this to a depth of about 8 inches and rake the soil until it is finely broken, and not lumpy, then with a hoe make trenches about 4 inches in depth and about 12 inches apart.

Then place a seed about every 2 inches apart in these trenches and cover with about one half inch of soil, water lightly and cover with about 2 or 3 inches of peat moss, as a protection against a slight frost or cold. About May 1st carefully remove the peat moss and in another week or two you will see the young dahlia plants breaking through the ground, add a little more soil to the trench and around the plants that are showing above ground, so that they will get better and stronger root formation. About June 1st many of these plants will be about 4 or 5 inches above the ground, showing two to three sets of leaves and the stems will be about the thickness of an ordinary match. They are then about the right size for transplanting.

In colder climates and where the growing season is not so long, is to start the seeds in boxes or flats about 20 inches long, 12 inches wide and 4 inches deep. Make 3 or 4 trenches about 2 inches deep and plant the seed about every 2 inches apart in these trenches and cover with about a half inch of soil. These seeds should be planted about 2 months before it is reasonably safe to transplant the young plants out into the open.

The box should be kept in a warm room and near a window that faces a sunny location. About 2 or 3 weeks later, they will be breaking out of the ground and when they are about 3 or 4 inches high, they should be removed from the box and transplanted into 3 inch flower pots, and on warm, sunny days, should be left out into the open to gradually harden, and when you believe that the time is right for their permanent transplanting as described above, then plant them as directed, and they will grow into strong, healthy plants, as good if not better than plants grown from tubers.

Of course if you have a greenhouse or a cold frame facilities, it will simplify matters by starting your seeds about March 15th and using the above last two paragraph principles.
